- **Databases:** MongoDB, PostgreSQL, MySQL
- **JavaScript Concepts:** Callbacks, Promises, Async/Await
- **Backend Development:** Node.js, Express.js, REST APIs, Middleware
- **Tools & Version Control:** Git, GitHub, Postman, npm
- **Authentication & Security:** Authentication(JWT), Authorization, Password Hashing
- **Core Knowledge:** OOP, HTTP/HTTPS, TCP/IP, Client–Server Architecture, Debugging, Basic Data Structures & Algorithms

Volunteering Experience

Volunteer Coordinator

ULAB Business Club

02/2025 – 12/2025 | Dhaka, Bangladesh

- Coordinated volunteer teams for club events, ensuring smooth execution and effective task delegation.

Projects

ULAB Lost & Found API

ULAB Lost & Found is a backend REST API designed to provide a structured way for the ULAB community to report lost items, record found items and manage ownership claims. Students can register and report lost items, while staff can record found items and review claims. The system uses role-based authorization and verification questions to make the claim process more reliable and reduce false ownership claims.
